DCE-C 6/8 Trend

COMPACT INSTANTANEOUS WATER HEATER

PRODUCT-NO.: 238148

Find the perfect mix

With this model, we have placed the emphasis on providing you with a convenient hot water supply. The electronically controlled appliance is preset to a constant 55 °C. This makes it ideal for everyday use. You simply mix in cold water directly at the tap to achieve the preferred temperature that's right for you.

The pleasure of water without the worries

Hard water is not a problem for this instantaneous water heater: The integrated bare wire technology reduces unsightly limescale deposits. In addition, there is hardly any residual heat in the heating system when the appliance is switched off.
