

# HTE 5

PRODUCT-NO.: 073008

Dry your hands comfortably and economically Since hygiene plays an important role in sanitary facilities, we have also equipped this hand dryer with an infrared sensor. This switches the appliance on without the need to touch it. Users simply have to hold their hands directly below the air outlet. This also makes operation extremely economical. Don't put up with noise The appliance dries hands remarkably quietly, so it is ideal for areas where loud noise would be a nuisance. The exterior is also just right: the casing protects against damage, but at the same time features an elegant design.
