

EBK 5 G

EBK 5 G

PRODUCT-NO.: 074286

The water boilers quickly raise the water to boiling point inside the clear high-grade glass container. The hot water is safely and conveniently drawn off through the integral tap, which is available in a classic chrome or elegant plastic version. There's no need for all that pouring and re-pouring when brewing large volumes of tea, for example, so reducing the risk of scalding. Equally, very small volumes of water – such as for a single cup of tea – are brought to the boil safely and economically. The temperature is variably adjustable and the appliance switches off automatically once the required temperature has been reached.

The main features

Water boiler

5 l glass container with white twin lever tap

Variable temperature selection

Boiling point sensor and automatic OFF control

Cold, warm or boiling water from one draw-off point

Type	EBK 5 G
Part no.	074286
Width	245 mm
Depth	242 mm
Colour	white

Technical data

Capacity up to	5.0 l
Connected load	2 kW
Power supply	1/N/PE
Rated voltage	230 V
Frequency	50 Hz
Container material	Glass
Weight	4,1 kg
