ISG Connect

CONTROL UNIT/ENERGY MANAGEMENT

PRODUCT-NO.: 206780

Optimally networked – even when on the move

Many convenience functions that are taken for granted today are only possible with an internet connection. Our Internet Service Gateway offers you the ideal interface for this. It enables you to control your heat pump system and integral ventilation units conveniently via an app or our Servicewelt. This means that you can easily create a comfortable climate in your home even when you're out and about.

Guaranteed comfort all the time

Our services not only ensure that your qualified contractor can perform optimisations remotely at any time and at your request. Even in exceptional situations such as network overloads, your comfort and convenience are still guaranteed – and you never have to go without cosy warmth in your home.

The main features

- Internet Service Gateway as a communication interface for heat pumps and integral ventilation units
- Simple and convenient control of your system via the app or Servicewelt portal
- SG Ready interface as standard for optimised PV self-consumption
- High data security thanks to encrypted communication
- Can be integrated into building management systems
- Comfort protection through integral output control in accordance with § 14a of the German Energy Industry Act (EnWG)
- Online optimisations by the qualified contractor possible via our Servicewelt portal

Type	ISG Connect
Part no.	206780

Installation information

Please ask your local power supply utility or a registered electrician to install appliances that are not fully wired, i.e. ready to plug in. The electrician should also be able to assist you with obtaining the agreement of the respective power supply utility required for the appliance installation.
