

WPE

CONTROL UNIT/ENERGY MANAGEMENT

PRODUCT-NO.: 234725

Targeted control – planned expansion. The heat pump manager system is a radical new control concept. The comprehensive functions of the standard module can be extended with this additional module and a remote control. All of these components can be conveniently connected to one another via the system bus. The heat pump manager is the central control unit of the system, its integral programming unit is able to regulate numerous functions, such as a cascade of two heat pumps or the control of one direct heating circuit and two heating circuits with mixer. Through module extension, a further four heat pumps and two further heating circuits with mixer can also be controlled. These heating circuits (five in total) can each be controlled by a remote control. The components combine functionality, extendibility and ease of installation. All the modules feature the attractive new design and have significantly improved connections for the electrical installation components.

The main features

Function extension module for the WPM

Control of two additional heating circuits with mixer

Swimming pool management

Type	WPE
Part no.	234725

Technical data

Protection class	I
IP rating	IP21
Supply voltage	230 V
Width	310 mm
Height	400 mm
Depth	100 mm
