

# WPF 66

PRODUCT-NO.: 233008

## Think big – go small

This compact heat pump meets your expectations of heating technology in large residential complexes, commercial premises and industrial buildings. As it can be installed either indoors or out, it is highly flexible. You need even less space if you install two appliances one on top of the other.

## Clever combinations

Combined with a suitable appliance, your heat pump cascade can be put to excellent use to provide hot water. The high flow temperatures ensure that your level of DHW convenience remains consistently high.

## The main features

Ground source heat pump for heating; suitable for indoor or outdoor installation

Outdoor installation for more indoor space

Suitable for new build and modernisation projects

Suitable for cascades with high output requirements

Suitable for large residential complexes, commercial premises and industrial buildings

Can be stacked to save space

Pleasantly quiet operation

Web-based control with Internet Service Gateway via computer

High DHW convenience thanks to high flow temperatures of up to 60 °C
